The performance data represents past performance, which does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Returns are for the period ended September 30, 2017 and reflect the deduction of the maximum sales load of 5.00%. Current performance may be lower or higher than the performance data quoted. To obtain performance data current to the most recent month-end, an investor may call toll free 800-276-1262 or visit www.integrityvikingfunds.com.

This Fund Fact Sheet must be accompanied or preceded by a prospectus. The Fund is sold by prospectus only. An investor should consider the investment objectives, risks, and charges and expenses of the investment company carefully before investing. The prospectus contains this and other information about the investment company. You may obtain a prospectus at no cost from your financial adviser or at www.integrityvikingfunds.com. Please read the prospectus carefully before investing.

Because the Fund can only distribute what it earns, the Fund's distributions to shareholders could decline when dividend income from stocks in the Fund's portfolio declines. The Fund's emphasis on dividend-paying stocks involves the risk that such stocks may fall out of favor with investors and underperform the market. Also, a company may reduce or eliminate its dividend, which could affect the Fund's ability to generate income. Please read the prospectus carefully for complete details on Fund risks.

Because the Fund normally invests in common stocks of companies engaged in natural resources-related activities in a limited geographical sector, the Fund's performance largely depends on the overall economic condition of that industry and geographical sector. Additionally, diplomatic, political or economic developments in foreign countries could adversely impact the Fund's investment in securities of foreign companies.

S&P Composite 1500® Index is a widely recognized, unmanaged index of 1500 stock prices chosen for market size, liquidity, and industry group representation. It is a market-value weighted index (stock price times number of shares outstanding), with each stock's weight in the index proportionate to its market value. Index return is shown from May 2, 2016.

The S&P 1500® Energy Index comprises those companies included in the S&P Composite 1500 that are classified as members of the GICS® energy sector. Index measures the performance of the energy sector of the U.S. equity market. Component companies include oil drilling equipment and services, coal, oil companies-major, oil companies-secondary, pipelines, liquid, solid or gaseous fossil fuel producers and service companies. Returns shown reflect no deduction for fees, expenses or taxes. It is not possible to invest directly in an index. Index return is shown from May 2, 2016.

***Distribution Rate** is an annualized rate of dividend distributions for shareholders taking dividends in cash based on actual dividend distributions and actual number of days in the distribution period.*

***SEC Yield** reflects the rate at which the Fund is earning income on its current portfolio of securities while the Distribution Rate reflects the Fund's dividends paid to shareholders in the prior quarter. Accordingly, the Fund's SEC Yield and Distribution Rate may differ. Rate and Yield are as of June 30, 2017*
