Integrity Mid-North American Resources Fund (ICPAX) has received U.S. Lipper® Fund Performance Awards in the Natural Resources category for 2012, 2013, 2014, 2015, 2016 and 2018.

The Lipper Fund Awards program highlights funds that have excelled in delivering consistently strong risk-adjusted performance, relative to peers. Lipper rankings are based on Consistent Return and do not take sales charges into account. Lipper's Performance Achievement Certificates are awarded to funds with returns that topped their Lipper category over 3-year, 5-year, and 10-year time periods.

Certificates are awarded for all Lipper Classifications and for the overall fund universe. Open-end funds, closed-end funds and variable insurance products are considered for awards. All funds in a category do not necessarily pass all the requirements to be included in the funds' awards process. Of the qualifying funds, Integrity Mid-North American Resources Fund was ranked 1 out of 37 for the 10-year time period ended Dec. 31, 2017; 1 out of 44 funds for the 5-year time period ended Dec. 31, 2015 - The Fund and category had negative performance for the time period cited for the 2016 award; ranked 1 out of 48 funds for the 3-year and 1 out of 44 funds for the 5-year time period ended December 31, 2014; 1 out of 44 funds for the 3-year and 1 out of 42 funds for the 5-year time period ended December 31, 2013; 1 out of 48 funds for the 3-year and 1 out of 47 funds for the 5-year time period ended December 31, 2012; and was ranked 1 out of 51 funds for the 3-year time period ended December 31, 2011.

The Great North American Shale Revolution

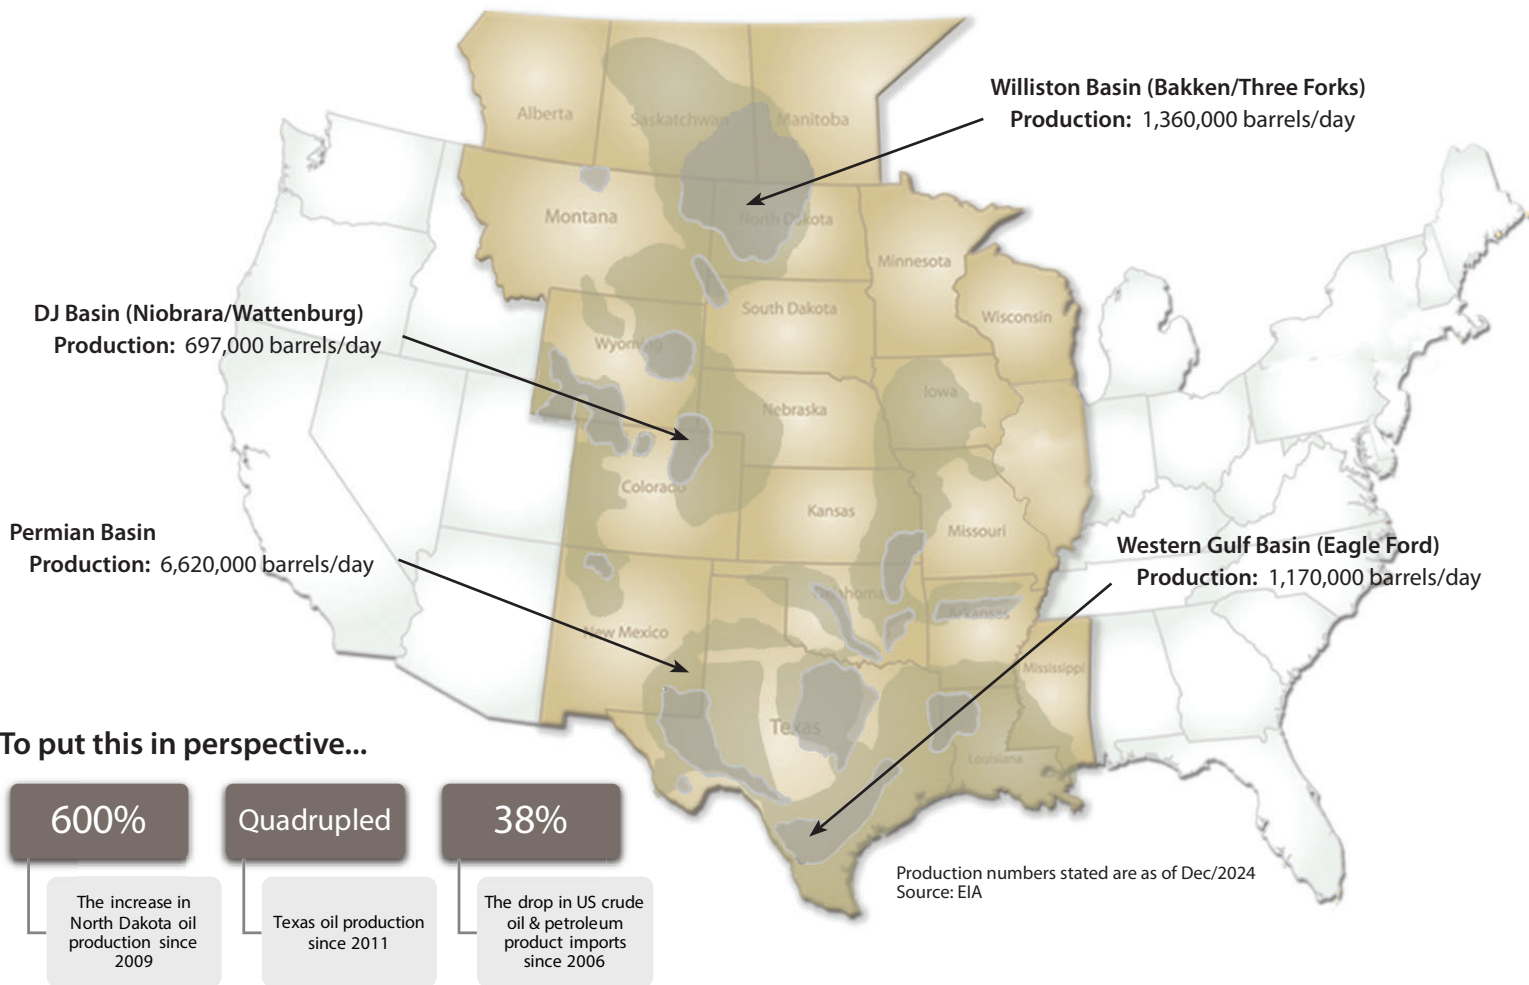

Energy sector growth in North America has largely been driven by increased domestic production from shale formations. The increased production has been a direct result of innovative techniques in drilling.

Many shale formations are located outside traditional production basins which has led to significant new infrastructure needs. Major investments have been made in transportation and infrastructure including: rail cars, rail terminals, pipelines, natural gas processing plants, and refinery expansions, to name a few. All of this is leading many to coin the term: 'Shale Revolution' to describe the landscape of U.S. energy.

Integrity Viking Funds' Integrity Mid-North American Resources Fund gives investors an opportunity to be a part of the activities in the North American Shale Revolution.

Worldwide Long-Term Energy Demand

The EIA (Energy Information Administration) projects world energy consumption will increase 56% by 2040.

Population growth and rapidly rising incomes will be the key factors to increased energy consumption in developing countries.

World energy consumption 1990-2040 (quadrillion Btu)

*Organisation for Economic Co-operation and Development
OECD member countries are: Australia, Austria, Belgium, Canada, Chile, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Israel, Italy, Japan, Korea, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Poland, Portugal, Slovak Republic, Slovenia, Spain, Switzerland, Turkey, United Kingdom, and the United States.

The portfolio may or may not hold and is not restricted to the companies listed above. Because the Fund normally invests in common stocks of companies engaged in natural resources-related activities in a limited geographical region, the Fund's performance largely depends on the overall economic condition of that sector and geographical region. Additionally, diplomatic, political or economic developments in foreign countries could adversely impact the Fund's investment in securities of foreign companies.
