Ethical investment criteria could cause funds to underperform similar funds that do not have such criteria. Among the reasons for this are: ethically aware companies could fall out of favor with investors or fail to perform as well as companies that do not fit the Fund's ethical investment criteria; stocks that do not meet the ethical investment criteria could outperform those that do; and the ethical investment criteria could cause the Fund to sell or avoid stocks that subsequently perform well.

Morningstar Rating: For each fund with at least a 3-year history, Morningstar calculates a risk-adjusted return measure that accounts for variation in a fund's monthly performance (excluding sales charges and including fees and expenses versus all funds in the Morningstar category), placing more emphasis on downward variations and rewarding consistent performance.
